

Ananda Arpana - Planting trees the right way

At Ananda Kanan during the Project Presentation Session brother Jivamukta presented the advancements at Ananda Arpana Master Unit. The entire process of planting trees require a specialized work which is better suitable for professionals . At the beginning the traces are drawn where eventually a tractor will plow and finally the new trees will be lined up. In the photographs it is possible to recognize the different phases of this important work for the development of any Master Unit.
