

# **Legacy of Our Baba, Shrii Shrii Anandamurti Jii, by Ac. Dhanjoo Ghista**

Good News of our book, Legacy of Our Baba, Shrii Shrii Anandamurti Jii, by Ac. Dhanjoo Ghista

In this centennial year, it is verily the time for us to take a big account of our dear Bábá's immense contributions to society. So, it has been a great pleasure for me to work with Acarya Dhanjoo Ghista on the publication of this novel book: Legacy of Our Baba, Shrii Shrii Anandamurti Jii. It is a very comprehensive 314-page book.

Bábá decided to come here as Taraka Brahma, for many reasons to (i) restore dharma, (ii) develop a cosmic vision and thinking among us, (iii) teach us how to connect with Cosmic Consciousness for our well-being and enlightenment, (iv) address poverty, by establishing a genuine democratic system of Prout, and (v) remove narrow divisive isms and provide care for animals, by setting up the Neohumanism doctrine.

In this enlightening book by Prof. Dhanjoo Ghista, we are presenting Items on:

1. Bábá's life, 2. Bábá's developments in 16 different fields,
3. Bábá's world tours to Maharlika, Qahira Sector, and Europe, to meet with His longing disciples, 4. Bábá's DMC discourses during His tours,
5. Bábá's parting gift of Gurukula.

Now it is not enough for us to just present Bábá's works and doings. It is our duty to also implement His ideals. So, in the presentation of Gurukula, we have outlined how we can set up Gurukula's Colleges to cultivate new knowledge in academic disciplines and fields, as well as to develop Ananda Nagar and the legendary Rarh region into providing progressive, sustainable living for the poor people.

Then finally, we are presenting the Vision of our 21st Century University, developing cosmic thinking and knowledge, building smart governance based on Prout, and promoting global citizenship and harmony. Through this global cosmic university, we now look forward to developing academic relations with universities worldwide. Thereby, we want to develop partnerships with them, by which we can develop new academic programs in these universities, to cover all of Baba's developments, from neohumanism to universalism, cosmology, and microvita to life creation and evolution, democratic governance to Prout, yoga, and meditation to yogic treatments and natural remedies, social justice to Bhagavata dharma, nuclear revolution to Mahavishva.

Now we have arranged for this book to be published by Amazon as both paperback and hardcover. So, may I request you to kindly inform everyone in your domain about this book so that they can purchase it from Amazon. This book will provide them with total information about Baba's works.

I will welcome hearing from you.

With my warm regards,

IN HIS LOTUS FEET

Acarya Hariishananda Avadhuta
